Twit Bot
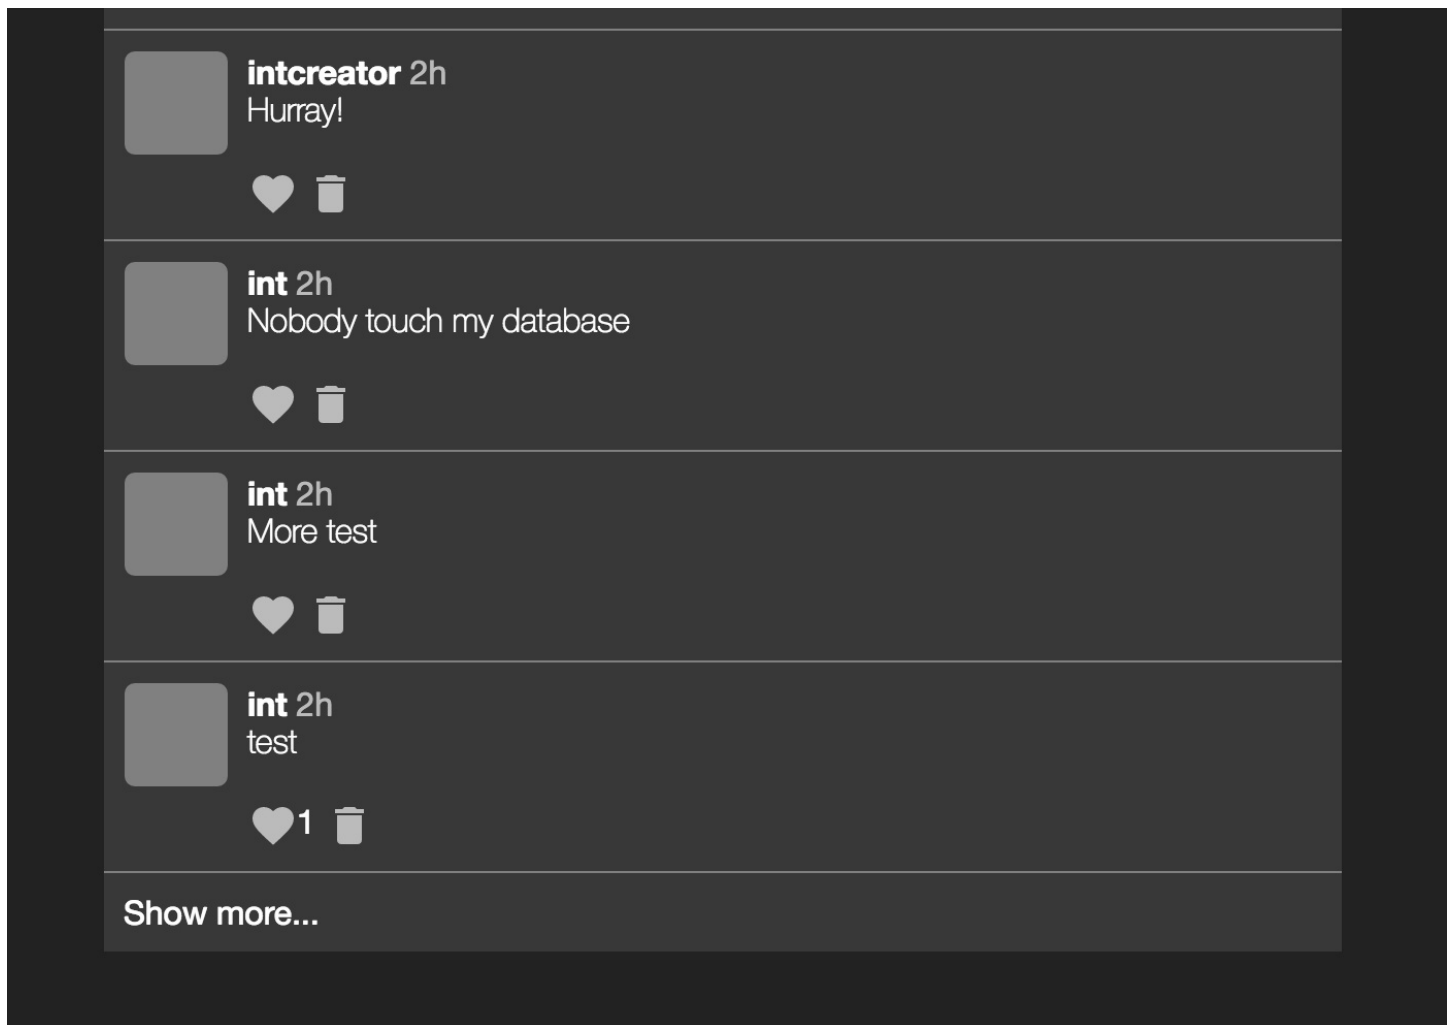

Use the Twit Bot online.

Note: because people were doing bad things like writing scripts to delete the database whenever someone posted to it, this bot is using a different database folder than `chatty`. As such, other users' tweets will not be shown.

Only show n recent messages

By default I show 10 tweets. The user can click on a button to see more.

Show messages in reverse chronological order

Tweets are displayed most recent first. I displayed the times since the tweet was created as well.

Twit Bot   SET USERNAME

Type something...

intcreator 1s
They are ordered by database key

♥ 🗑

intcreator 9s
You can see the ordering of the tweets

♥ 🗑

**developer** 19m
No don't

♥ 🗑

**tester** 19m
Can I break this?

♥ 🗑

Character limit for tweets

I limited the characters a user can enter to 140. The number of remaining characters is shown and updated live when the user types.

It turns from white to red as the user approaches the character limit.

If the limit is reached, the "Twit" button is disabled and the character count shows the number of characters the user went over.
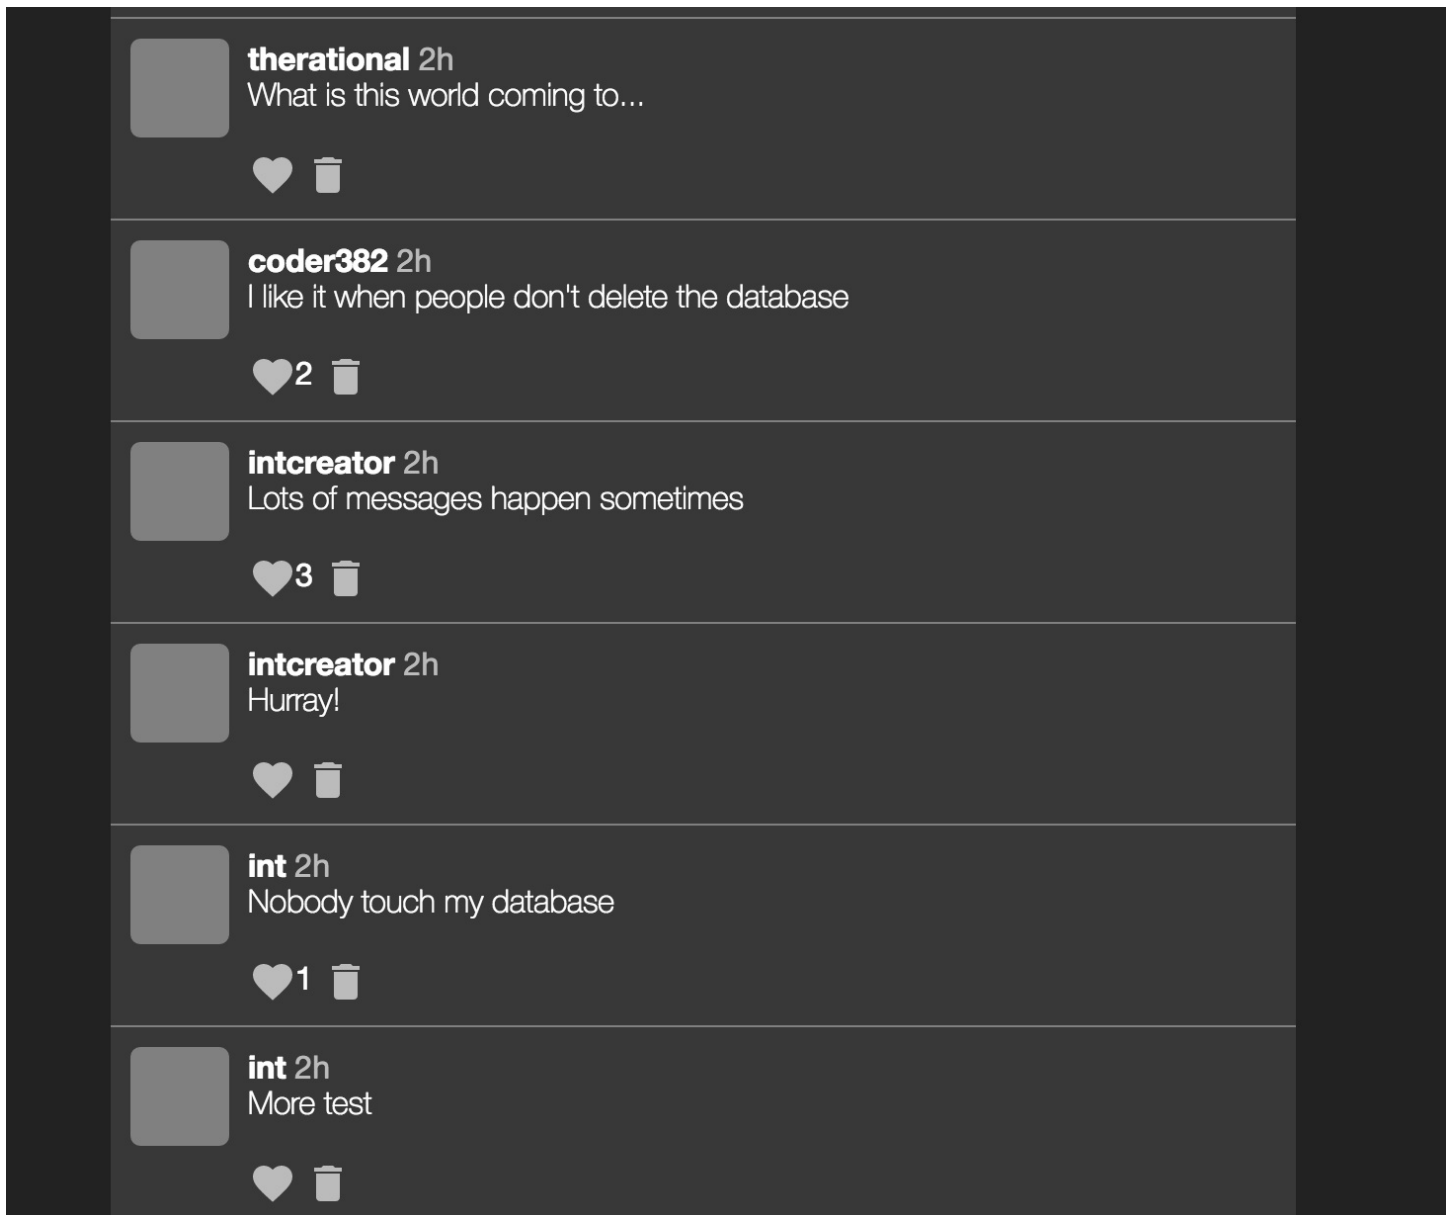

Favorites

Users can favorite tweets in the database by clicking on a heart. They can unfavorite that tweet by clicking on the heart again. The number of people who favorited a tweet is shown next to the tweet.

What is this world coming to...

♥ 🗑

coder382 2h
I like it when people don't delete the database

♥2 🗑

intcreator 2h
Lots of messages happen sometimes

♥3 🗑

intcreator 2h
Hurray!

♥ 🗑

int 2h
Nobody touch my database

♥1 🗑

int 2h
More test

Deleting tweets

Users can delete tweets by clicking on the trash can icon. Once a tweet has been deleted, it immediately disappears from the view.

someguy 1s
I'm going to delete the database again!
